

Egg Freezing & Boca Fertility

Now is the time

Elective egg freezing gives you the opportunity to change your reproductive options.

Now is the time to take proactive action in preserving your fertility.

Elective Egg Freezing

Elective egg freezing may be considered if you are between the ages of 30 - 39 and not ready for childbearing.

The average number of eggs (oocytes) we have retrieved at our center is 12 eggs per treatment cycle.

Medication and testing is not included in your cycle. Testing can be covered by insurance. Please contact our office to set up a consultation to help you plan your Fertility calendar.
